

# Guidelines on Esophageal Function Testing and Interpretation

The Lyon Consensus Meeting  
November 10<sup>th</sup>, 2017

## **GERD: Guidelines on Esophageal Function Testing and Interpretation: The Lyon Consensus Meeting**

The language of the course is English

### **Thursday November 9<sup>th</sup> :**

**13:00 – 17:00: Clinical session (Edouard Herriot Hospital)**

*Limited number of participant, please register by sending an email to [sabine.roman@chu-lyon.fr](mailto:sabine.roman@chu-lyon.fr)  
Only registered participants will be admitted to attend*

Discussion of difficult clinical cases regarding GERD diagnosis and management  
Interactive sessions with participants

Speakers: Dr Sabine Roman (Lyon), Pr François Mion (Lyon), Pr Prakash Gyawali (St Louis, USA)

**18:00** Welcome reception (Mediatheque – Rockefeller)

*All participants registered for the meeting of November 10<sup>th</sup> are invited to attend*

### **Friday November 10<sup>th</sup>** (Mediatheque - Rockefeller)

Registration on the website <http://lyongerdmeeting.univ-lyon1.fr/en/pages/gerd2017-home> is mandatory. In absence of registration on the website, the access to the meeting will be denied.

**8:30 – 8:45: Introduction:** How to diagnose GERD in 2017? Summary of the GERD consensus project (Sabine Roman – Lyon)

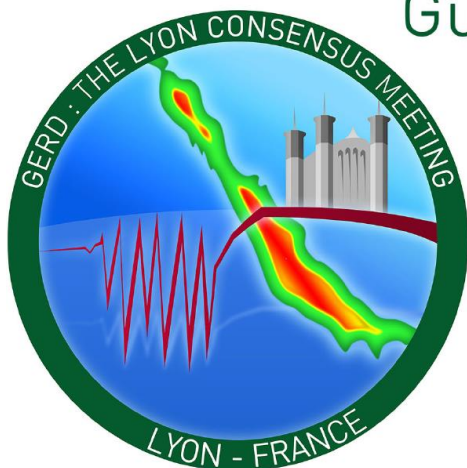

#### **8:45 - 10:45: Testing for GERD**

8:45 - 9:15: Role of endoscopy and histology in GERD diagnosis (Pr Marcelo Vela, Scottsdale, USA)

9:15 – 9:45: Role of pH-(impedance) monitoring in GERD diagnosis (Pr Frank Zerbib, Bordeaux, France)

9:45 – 10:15: Is baseline impedance ready for prime time in GERD diagnosis? (Pr Edoardo Savarino, Padua, Italy)

10:15 – 10:45: Reflux symptom association in GERD: Are the current indices reliable? Can they be improved? (Pr Andre Smout, Amsterdam, Netherlands)

# Guidelines on Esophageal Function Testing and Interpretation

The Lyon Consensus Meeting  
November 10<sup>th</sup>, 2017

**10:45 – 11:15: Coffee break**

**11:15 – 11:45: Classifying GERD:** GERD phenotypes based on reflux testing: are they useful in clinical practice? (Pr John Pandolfino, Chicago, USA)

**11:45 – 12:45 : Diversatek Healthcare symposium** – “Mucosal Impedance: The better way to Diagnose GERD and EoE” (Pr Michael Vaezi , Nashville, USA)

**12:45 – 14:00: Lunch break**

**14:00 – 16:30: Motor classification of GERD**

14:00 – 14:30: How to assess EGJ barrier function in GERD? (Pr Peter Kahrilas, Chicago, USA)

14:30-15:00: Is it important to assess esophageal peristalsis and clearance in GERD? (Pr Radu Tutuian, Bern, Switzerland)

15:00 – 15:30: Role of multiple rapid swallows and rapid drink challenge in GERD (Pr Daniel Sifrim, London, UK)

15:30 – 16:00: Role of post prandial HRM in GERD (Pr Francois Mion, Lyon, France)

16:00 – 16:30 Proposal of a classification scheme for motor dysfunction in GERD (Pr Prakash Gyawali, St Louis, USA)

**16:30 – 16:45 Coffee break**

**16:45 – 17:15 Therapeutic implications**

Outcome measurements: How should we evaluate response to treatment in GERD? (Pr Jan Tack, Leuven, Belgium)

**17:15 – 17:45: Conclusions** – What do we need to improve GERD diagnosis and management in the future? Next steps of the GERD consensus (Prakash Gyawali, St Louis, USA)
